

Appln. No. 09/882,472
Amendment dated Feb. 15, 2004
Reply to Office Action of Nov. 15, 2004
Docket No. 6169-157

IBM Docket No. BOC9-2000-0016

Amendment; to the Abstract:

A method for processing speech audio in a network connected client device can include selecting a speech grammar for use in a speech recognition system in the network connected client device; characterizing the selected speech grammar; and, based on the characterization, determining whether to process the speech grammar locally in the network connected client device, or remotely in a speech server in the network. ~~In one aspect of the invention, the selecting step~~ Selecting can include establishing a communications session with a speech server; and, querying the speech server for a speech grammar over the established communications session. ~~Additionally, the selecting step~~ Selecting can further include registering the speech grammar in the speech recognition system.
